RE: Sponsorship Opportunities – 62nd Annual Region VI Meeting Desk and Derrick Club of Tulsa

Dear Sir/Madam,

Celebrating 65 years of service to our members and industry, the Association of Desk and Derrick Clubs (ADDC) is a dynamic organization and an industry leader in promoting education of the petroleum, energy, and allied industries. ADDC is a major contributor of energy education through informative programs, onsite field trips, workshops, seminars, and teaching publications.

Serving nearly 2,500 individuals employed in or affiliated with the petroleum, energy, and allied industries, ADDC is comprised of 51 clubs within 7 regions throughout the United States and Canada. Desk and Derrick Club of Tulsa is in Region VI and serves members in Oklahoma and Kansas.

Membership in a club is granted to individuals interested in increasing their knowledge about these industries. Our mission is to enhance and foster a positive image to the global community by promoting the contribution of the petroleum, energy, and allied industries through education by using all resources available. Our motion is "Greater Knowledge – Greater Service".

Desk and Derrick Club of Tulsa will host our 62nd Annual Region VI Meeting April 27-April 30, 2017 at POSTOAK Lodge & Retreat located at 5323 W 31st St North, Tulsa. This event will offer Certification Programs, Field Trips, Networking, Leadership and Team Building that will support various aspects of the oil and gas and allied industries. The Club is striving to make this event an outstanding educational opportunity for all attendees.

We are seeking sponsorships for this year's Region VI Meeting, and hope that you will consider a contribution*. We are offering several sponsorship levels listed on the Sponsorship Form. However, any donation will be greatly appreciated, including company logo items for registration bags.

On behalf of all our members, thank you for considering sponsorship of the 62nd Annual Region VI Meeting.

Sincerely, 2017 Region VI Sponsorship Co-Chairmen

Kay Williams Ph: 918-810-0913 email: <u>kwilliams@rimrockresource.com</u> Vicki Barnes Ph: 918-858-5173 email: <u>vbarnes@laredopetro.com</u>

62nd Annual Region VI Meeting Hosted by the Desk and Derrick Club of Tulsa April 27-30, 2017

Region VI Director Wendy Sparks and the members of Desk and Derrick Club of Tulsa proudly extend an invitation to each of you to join us for the 62nd Annual Region VI Meeting held April 27th through

April 30th in Tulsa, Oklahoma. We will gather at a relaxing, peaceful venue at the POSTOAK Lodge and Retreat.

The Region VI Meeting will be filled with excitement and many aspects you will never forget. Attendees can gain knowledge through a Geology Certification Seminar and will hear from two interesting speakers on Saturday.

Registration, hospitality and hotel check-in will be available from 4:00 P.M. – 6:30 P.M. on Thursday, April 27th. Zipline tours are available daily and can be arranged by calling Postoak's front desk at (918) 425-2112. On Thursday evening, we will gather and enjoy a dutch treat meal at The Rusty Crane restaurant in downtown Tulsa. Friday field trips have been scheduled to visit: (1) Osage Windmill Farm with a stop for lunch at Grill 125 and shopping at The Pioneer Woman Mercantile in Pawhuska or (2) Grand River Dam Authority Pensacola Dam with a stop for lunch at an Amish farm in Choteau. Friday evening will be a fun-filled Social at the Lodge. We plan to offer BBQ dinner, human foosball, volleyball, bonfire and a cash bar.

The entire Registration Packet, including a printable Registration Form, can be found <u>here</u>. For your convenience, *Club Members can register and pay online <u>here</u>, or click <u>here for guest registration</u>.Registration fee includes the Friday evening Social, the Saturday Industry Appreciation Luncheon, the Awards Banquet, as well as snacks. This packet contains hotel information and more details about all the activities.*

The hotel accommodations are at POSTOAK Lodge and Retreat, 5323 W. 31st Street North, Tulsa, Oklahoma. (918) 425-2112. The Lodge is set on 1,000 wooded acres and located 5.7 miles north of downtown Tulsa. Hotel-style room options include either one gueen bed or two double beds

3

for the cost of \$109 per night (plus tax). Rooms hold up to 2 guests and include a refrigerator and microwave in the common area. This rate includes two continental breakfasts per room. Be sure to ask for the Desk and Derrick Club of Tulsa rate when making your reservation.

(Planning continued from page 3)

Committee: Program

Chairman: <u>Gay Wheeler</u>

Report: <u>Items still needed for program</u>: Bio and photo of person doing Tulsa welcome; Boy Scout Troop #; names of ADDC Officers & Committee Chairs, past Region VI Directors, first timers that will be in attendance (after registration closes); confirm Photography Schedule; acknowledgements of sponsors and volunteers. See attached sheet for what I have on volunteers so far.

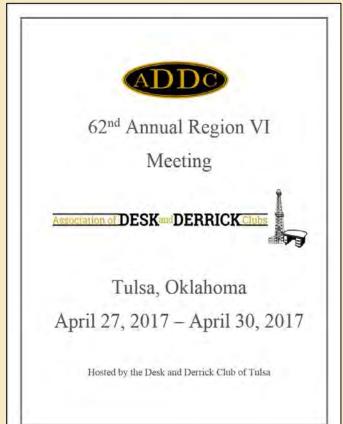

Committee: Field Trip

Chairman: Beth Johnson

Report: Gay Wheeler and Kay's husband will be the 2 drivers for the Osage Wind Farm. I still need 1 or 2 drivers for Pensacola Dam tour, depending on how many people sign up. When we get final numbers I will follow up with tour guides and lunch places with final numbers.

Beth Hesling, Gay Wheeler and I drove the route in Feb. and verified times I had estimated. Also attached is a spreadsheet with detail about each field trip. I have made a word search game with D&D terms we will hand out on the vans.

Committee: ___Hospitality____ Chairman: ___Dorothy Lenhart___

Report: A list of items needed was drafted and sent to the hospitality committee, including paper goods, beverages, individual snacks, breakfast-type items and fruit to stock the Hospitality Room. Some of the committee members have also volunteered to bring some homemade items for our guests, and to help with the shopping.

Our contact at the Post Oak Lodge confirmed that only water and coffee would be provided in the main lodge where the meetings would be held. Our contract does not include any snack break items, and no outside food/drinks are allowed in the main lodge area. Attendees will be able to visit the Hospitality Room in the Lodge #1 kitchen upon arrival or in between meetings and activities to grab a quick snack and beverage and mingle.

Committee: Sponsorship

Co-Chairmen: Kay Williams & Vicki Barnes

Report: To date, the Sponsorship Committee has sent approx. 65 sponsorship letters and forms to companies and individuals. This does not include the copies sent to all Tulsa Club members, requesting that they submit them to the appropriate person within their respective companies. We still have 20 companies/names which we continue to research for contact information.

On March 15-16th, we sent deadline reminders by emails.

(1) OSAGE WIND FARM AND PIONEER WOMAN MERCANTILE

Enel Green Power operates the Osage wind farm. During the tour, we learned that 90% of the farm's generated power is sold to Oklahoma customers. Windmills require a lot of maintenance. Components in the hub (nose) require lubrication while bearings and electrical parts may require frequent replacement due to overheating. Operators climb ladders inside the windmills with safety harnesses and even walk on top of the nose! Fear of heights, anyone?

To install a windmill, two cranes work together to hoist the hub and blades, helping a crew assemble a unit in only three hours. Power from the area's electric grid is required to start up the windmill each time sensors sense that wind speed is above 5 mph and can sustain the windmill by wind only. Many people are unaware that windmills use a substantial amount of electric energy to start up many times per day, and that they kill many large predator birds, disrupting the food chain. In a tornado or high winds, the blades and swivel (pitch) back 90 degrees to let the wind go by to prevent spinning the blades faster than they are designed to spin.

Windmills are big business, at \$2-3 million dollars of capital costs for each windmill, plus the substation and parts inventory and a few full-time staff. Land owners who can deal with the squeaking and whooshing sounds can enjoy earning \$1,000/month per turbine on their property, or about \$1.0 million dollars per year in lease revenue from the 84 turbines on this one farm. Of particular interest to an entrepreneur or accountant is there are two types of lease arrangements for the land: fixed payments like \$1,000/month, or a variable profit-sharing arrangement based on volume of kilowatts generated.

Our tour guide also discussed some of the technical engineering of the windmills. The most expensive part, the six frequency converters, can act like a high speed switch, cycling the generated current on and off 20,000 times per second to form a perfect 1200rpm or 60hz sine wave that is needed to send usable current to the transformer station. Amazingly, one windmill can generate 50,000 kW, or enough to power 600 homes. The 84 windmills on this relatively small farm can power 50,000 homes. We learned that the electric power generated is very inconsistent due to the nature of changing wind speed, unlike the consistent energy source from an oil well. To optimize the wind available, the computer software in these General Electric windmills can automatically turn and point the nose into the wind when wind changes direction.

The tour concluded by looking inside a windmill and standing below it as it started up. It was rather scary seeing an enormous blade swing down towards me, but it made a thrilling whooshing sound. Our field trip's participants greatly increased our appreciation for alternative forms of energy. ~ Jonathan Slay

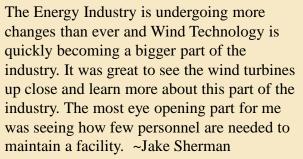

(Field Trips continued from page 13)

A-1

The Tulsa Oil Drop JUNE 2017 Special Edition

Being my second trip to a Wind Farm, this was the first time to be able to get up close to the wind turbine. Fascinating to view it from the inside looking up. I sure wouldn't want to be one whom has to climb all of the stairs to get to the top. I also thought it was neat that we could see a wind turbine and right next to it a pump jack and cows. ~ Marilyn Trout

WORLD'S ONLY MAIN STREET OIL WELL COMPLETED MARCH 16, 1914 DEPTH 1771 FEET BARNSDALL, OKLAHOMA

(Field Trips continued from page 15)

(2) GRDA PENSACOLA DAM AND AMISH LUNCH

Here are a couple of interesting facts I learned about the Pensacola Dam. Pensacola Dam was built in 20 months from December 1938 to August 1940. President Franklin Roosevelt approved \$20 million in funding for the construction. When water levels exceed or are anticipated to exceed the target water levels, the Corps of Engineers take control from the Grand River Dam Authority and determine how much water is released through the floodgates.

~ Beth Johnson

(Field Trips continued from page 16)

I was glad the lake level was high and we could see the water flowing. The GRDA visitor center was very nice, After Memorial Day they will be open to the public, in the winter you can only book private tours. The most amazing to me was seeing the giant generators powered by the water that have been running continuously since 1942. And I absolutely loved the architecture of the dam with 51 arches! Immediately after taking my seat at the Amish Farm I was passed a tray of hot homemade rolls, everything was extremely delicious. Luckily the weather was good when we got back to POL because we had to walk some of it off. ~ Jill Klein

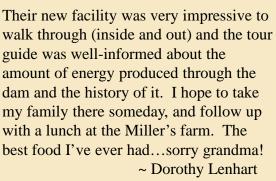

The Tulsa Oil Drop JUNE 2017 Special Edition

The field trip to the Pensacola Dam and the Amish House was great! I loved getting to know the D&D members on the van ride. Our guide was very knowledgeable about the history of the building of the dam and how it worked. The hydroelectric inner workings below the dam were fascinating. I do not know how many times I have crossed that bridge never realizing what was below or how the dam worked! Of course, the lunch at the Amish House was out of this world! This field trip was well worth the time and money spent to visit! ~ Karen Chism (Field Trips continued from page 17)
